## How to Create a HOG Ride

### **Navigating to the correct area of the website**

1. Log onto the Harley Website at [www.harley-davidson.com](http://www.harley-davidson.com)
2. On the top middle section of the main screen, put (**hover**) your cursor on "Discover HD" SEE SAMPLE ON PAGE A
3. A menu will appear on the left of the screen. Hover on "Riding HUB" which is in the menu on the left. "Ride Planner" will be to the right of Riding HUB. Click on "Ride Planner". SAMPLE ON PAGE B
4. Click on the "Sign In" on the upper right of the screen and sign in. SEE SAMPLE ON PAGE C

### **Create a Ride**

1. Click on "Create" which is in the top middle area of the screen. SEE SAMPLE ON PAGE D
2. Enter the title of your ride in the upper left corner where it says, "My Awesome Ride". Enter the starting point of your ride in the area on the top left. Using the street address will give you the best results. SEE SAMPLE ON PAGE E
3. Enter the destination address next. After clicking on "Enter" on your **keyboard** an orange route should appear on the map. SEE SAMPLE ON PAGE F
4. Before adding Way-Points which help guide the GPS, click on the icon in the bottom left of the screen that looks like a gear and says "Avoid". Choose the type of road you do not want to use for travel such as dirt, gravel, interstate etc. Always leave "Highway" checked or you will have issues mapping. SEE SAMPLE ON PAGE E

5. Click on "List Waypoints" which is above the address locations. It should turn orange once you click on it. Start adding Waypoints. A waypoint is added by clicking on the orange route whenever you decide. **SEE SAMPLE ON PAGE E** Good spots for waypoints are before and after turns (not curves) in the road. Then the GPS will know the route you want to take. **\*\*\*\*\*** It is very important to make sure the orange dot waypoints are directly on the orange road/route, or the GPS will want to reroute you. Therefore, you must **Enlarge the route** using the + or - signs on the bottom right **SEE SAMPLE ON PAGE I** or use your cursor. Click on the waypoint and drag it to a spot on the road. **\*\*\*\*\*** If the map takes you on an interstate or other highway that you do not want to use, click on & drag the orange route (line) **SEE SAMPLE ON PAGE G** from the interstate to the road you want to use. **SEE SAMPLE ON PAGES H & I**
6. When finished, review your route. Click on "Save Ride" on the upper right of the screen in orange. **SEE SAMPLE ON PAGE I** After you save, a "field" will appear on the left side of the screen. Write a description of the ride under the Name Your Ride field. Next click "Save Ride" that is in orange in small print on the bottom of the ride description. **SEE SAMPLE ON PAGE J**
7. To share the ride with someone, click on "Saved" in the top right. A list of rides will appear. Select the ride you want to share. A menu will appear in the top right of the screen. Click on the 2nd icon from the left. The icon is 3 connected dots. A drop-down menu will appear, click on the last icon. This will copy the link that you can now email to someone. (For 2018 bikes and older models, the ride will have to be saved to a thumb drive to save it on your bike.)
8. After saving the ride, it will automatically go to your bike via Bluetooth.

### How to Access Ride on Bike

1. Your phone must be blue toothed/paired to your bike in order to upload the ride to the bike. Put the bike on Accessories or start

it. Toggle to Home or touch the "Home" icon on the upper left of the screen.

2. Toggle/touch the N that is in the middle of the screen.
3. Toggle/touch to the "Search" field in the upper left. Toggle/ touch.
4. Different fields will appear from which to choose. Choose the "HD App" icon. The rides that you created will be listed under the HD App icon. (If you choose the Saved icon, all of your waypoints will be in this section.)
5. Toggle/touch the ride that you want to use. You will be asked to save it again. Toggle/Touch "Save"
6. Enjoy your ride!

Sherry Pursell 208-342-4087

### Pointers for the HOG App & Mapping

1. To access your rides on the app, click on your picture in the upper left corner.
2. To access our HOG chapter rides, click on "Connect" in the bottom of the screen. Click on "Groups". Choose the Intermountain HOG group that is a picture of pine trees in the mountains.
3. To view the rides that have been posted for our group, click on "Posts" which is under Intermountain HOG Rides.
4. If an edited ride is emailed to you, click on the link in your email. Ride Planner will open. A drop-down menu will appear on the right.

Next to the GPS Export there is a very small + sign which is copy. Click on the + sign. Go the title of your ride. This is very important.....place your cursor directly in front of the first word of the rides name and back space to remove Copy of which will be in front of the ride name. Click on "Save Ride" which is in small orange print on the bottom left of the screen.

5. Waypoints should be named especially on long rides to make the route easier to follow. Click on a waypoint that is listed on the left side of your screen. When you click on a waypoint an orange pencil will appear to the left of the waypoint. Click on it. On the top line of that waypoint where it says, "Name the Location", type in the name for that waypoint (ex. Chevron, Restaurant Name etc.)
6. A UTube video is also available also. Watching it might help as you will see what the screens look like. [ezmototim.com](http://ezmototim.com) has videos that are available and easy to follow although some of his screens might vary from yours.

### Share to Intermountain Rides on App

1. Open App
2. Click on Profile
3. Go to Rides → View All
4. Choose Ride to Share
5. Choose Edit / Pencil in Upper Right
6. Choose Continue
7. Choose Save
8. Send to Intermountain Rides
